Service, Ltd.

VISUAL PROOF OF DELIVERY

Maintain Real Time Visibility

With online ordering growing by record numbers, UDS continues to be an innovator in technology and providing delivery assurance to its customers.

Company drivers take photos of the packages when they are delivered to residences and are viewable by your customer service team.

Visual Proof Of Delivery (VPOD) or Visual Proof Of Attempt (VPOA)

technology is a unique advantage for both the shipper and recipient.

VPOD

Visual Proof Of Delivery

Real Time Package Visibility

Through the use of our own proprietary technology such as geocodes, GPS, mapping API's and other technologies, UDS can offer total visibility into the delivery process.
